Subject: Advanced Notification – 2025 Water Main Improvements Project
Property: «ADDRESS»

Dear Property Owner and/or Resident,

The purpose of this letter is to inform you that water main improvements are scheduled along your street during the 2025 construction season. A project list and location map are enclosed for your reference. The street will be resurfaced once the underground water main work is complete.

Advanced notification is being provided so property owners that are scheduling improvements can plan accordingly. Notably, if you are planning work that will require excavation in the street or parkway, such as sewer and water service repairs, it is important to complete the work before the street is resurfaced.

Property owners and residents should also be aware of impacts to the water service line. As part of the 2025 Water Main Improvements Project, the City will be replacing lead service lines from the water main in the street to the water meter in the house at **no additional direct cost to the property owner**. A representative from CDM Smith Inc., a consulting engineering firm hired by the City, has started visiting all homes on the 2025 Water Main Improvements Project to share information about the program and provide the instructions to sign-up. For more information please visit:

<https://www.evanstonleadreplacement.org/annual-water-main-project>

Water main improvement projects generally occur between the months of May to September, with work lasting approximately twelve weeks per street, depending on the scope of work. A detailed newsletter will be delivered to all properties on your street with the date that work is scheduled to begin and the contact information of the construction supervisors once a contractor has been selected and the work has been approved by the City Council.

Please do not hesitate to contact Bridget Nash if you have any questions or should require any additional information at bnash@cityofevanston.org or 847-448-8102.

Sincerely,

Lara Biggs, P.E.
Bureau Chief / City Engineer

Bridget Nash
